<i>Onshore Supervisor Qualifications</i>		
NB: While ADAS may accept onshore supervisor applications from Canada, Netherlands and South Africa, training varies in each country, so applications are judged on an individual basis.		
Royal Australian Navy (RAN) <i>Qualifications issued prior to 1/03/2012 only</i>	RAN SCUBA Air Supervisor	Scuba to 30m (Part 1 Supervisor)
	Advanced Clearance Divers	Scuba to 30m & SSBA to 50m (Part 1 & 3 Supervisor)
	Intermediate Clearance Divers	Scuba to 30m & SSBA to 30m (Part 1 & 2 Supervisor)
	RAN Clearance Diving Officers	Scuba to 30m & SSBA to 50m (Part 1 & 3 Supervisor)
	RAN Reserve Diver SSBA Supervisor	SSBA to 30m (Part 2 Supervisor)
Australian Army	Army Working Diving Supervisor	SSBA to 30m (Part 2 Supervisor)
<i>Offshore Supervisor Qualifications</i>		
International Marine Contractors Association (IMCA)	Air Diving Supervisor	Offshore Air Supervisor
	Bell Diving Supervisor	Offshore Air & Bell Supervisor
Canada Diver Certification Board of Canada (DCBC)	Air Diving Supervisor	Offshore Air Supervisor
	Bell Diving Supervisor	Offshore Air & Bell Supervisor
<i>Diver Medical Technician Qualifications</i>		
International Marine Contractors Association (IMCA)	Diver Medic	Diver Medical Technician (DMT)
Diver Certification Board of Canada (DCBC)	Diving Medical Technician	Diver Medical Technician (DMT)
<i>Life Support Technician Qualifications</i>		
International Marine Contractors Association (IMCA)	Assistant Life Support Technician	Assistant Life Support Technician (ALST)
	Life Support Technician	Life Support Technician (LST)
	Life Support Technician Supervisor	Life Support Technician Supervisor (LSS)

Mutual Recognition Arrangements

* Closed Bell Crossover Applications

ADAS reserves the right to undertake logbook checks on Part 4 (Closed Bell) applications to ensure that the training received is compliant with the IDRCF Standards, which includes the following requirements:

- 29 bell lockouts as a diver including one to 55 metres, one to 70 metres and one deeper than 80 metres.
- Act as a diver from a storage depth deeper than 50 metres on two bell runs. The lockout for these bell runs should be at least 15 minutes for each dive on each occasion.
- 29 bell lockouts acting as a bell-man (standby diver)
- 14 complete bell runs including transfer under pressure
- Decompression from a living depth deeper than 50 metres

Applicants who cannot show evidence of having completed the above will be required to demonstrate competency in the missing components. This can be achieved via a top-up training program at an approved diver training school, an RPL process or other evidence as approved by ADAS. Applications will be considered on a case-by-case basis by ADAS.
