

First Aid Certifications

The following First Aid Certifications are those which comply with AS/NZS 2299.1 Standard and are **accepted for enrolment into ADAS courses**.

Note:

Some Oxygen Administration qualifications do not include training on Bag Valve Masks. These may still be accepted by diving contractors, and are suitable for renewal of ADAS diver and supervisor certifications. However, they are not accepted for enrolment into ADAS courses.

This includes 22575VIC “Basic oxygen administration for first aid” as well as some courses delivered by recreational dive agencies. Please contact ADAS for further advice if you have questions about the suitability of your Oxygen administration qualification.

The certifications shown below are available through Australian based First Aid providers.

Requirement	Acceptable Courses (Official name)	Nationally Recognised Training Number
First Aid (No more than 3 years old)	Provide First Aid <i>(also includes CPR)</i>	HLTAID011
Oxygen Administration/Management (No more than 12 months old)	Provide Advanced Resuscitation and Oxygen Therapy <i>(also includes CPR)</i>	HLTAID015
	Administer Oxygen in an Emergency	PUAEME006
CPR (No more than 12 months old)	Provide Cardiopulmonary Resuscitation	HLTAID009
Combined Certifications <ul style="list-style-type: none"> • First Aid • Oxygen Administration/Management • CPR 	Provide Advanced First Aid <i>(Includes First Aid and CPR)</i> <i>Note: Main difference between this and HLTAID011 is the inclusion of coordination of first aid activities and teams</i>	HLTAID014
	Provide Advanced Resuscitation and Oxygen Therapy <i>(Includes Oxygen Admin and CPR)</i>	HLTAID015
	<i>Provide Advanced Resuscitation (superseded)</i>	
ADAS First Aid Courses	Some ADAS ATEs are accredited to conduct the ADAS Combined First Aid course which covers all requirements of the 2299.1 Standard. See the ADAS Combined First Aid website page for more information.
